ABSTRACT

This bibliography lists more than 600 publications that deal with staff development information pertinent to education. It presents information on staff development for specific educational fields, as well as for different educational levels; however, no attempt has been made to list staff development articles dealing with particular teaching subject-matter areas. The publications listed were drawn from "Education Index" and from the Educational Resources Information Center (ERIC) catalogs "Current Index to Journals in Education" and "Resources in Education." Only materials published from 1970 through 1976 are included. Citations are grouped into 18 topical categories and are listed alphabetically by author's name within each category. For each publication that is listed in the ERIC catalogs, the six-digit ERIC identification number is included in the citation. (JG)

TO THE USER

This bibliography on staff development was compiled to assist administrators, staff development specialists, instructors, and others who are directly concerned with finding printed material containing information for improving the quality of teaching now going on in the various educational levels of our society.

Besides using the Education Index as a source for scholarly journal articles on various aspects of staff development, search for additional material was also made in Current Index to Journals in Education, which lists articles that can be found in magazines devoted to the various areas of education. Search for additional material was also made in Resources in Education, which contains published and unpublished monographs in this field.

This bibliography covers materials from 1970 through 1976 and is confined to staff development information pertinent to education. It presents information on staff development for specific educational fields as well as for particular levels of education. No attempt has been made to list staff development journal articles in any teaching subject area.

The format used in compiling this bibliography was Kate L. Turabian's A Manual for Writers of Term Papers, Theses, and Dissertations, Third Edition, Revised. Entries in this collection that are followed by a six-digit number prefixed with the letters ED are Education Resources Information Center (ERIC) documents.
